

## Frequently Asked Questions

### Poster

**Q: My poster display was damaged during shipment. There is no way that I can get it repaired. What do I do? Will this count against me?**

*A: No, the Stockholm Junior Water Prize (SJWP) competition is primarily judged on the content of the paper and the presentation. The jury looks to the display board to see if all of the technical information is presented. Damage to this board will not affect how you are judged*

**Q: Several countries have very sophisticated displays while mine is a cardboard display of standard size. Will the competitors with the elaborate displays receive extra credit – do I stand a chance of winning with my poster?**

*A: Again, the display is not the main judging criteria for the SJWP. Judges are interested in the content of the paper and how the students present this information.*

### Presentation

**Q: When the judges interview us, what should we expect?**

*A: Generally, the judges allow 15 minutes per interview. During each interview, the finalists are expected to use approximately 5 minutes to present their project. The remaining time, the judges prefer ask questions.*

**Q: How many times do I present my project to the jury?**

*A: There are three jury groups and the projects should be presented to all members of the jury. Hence, the finalists will give their presentation three times.*

**Q: The jury did not spend ten minutes with me. What does this mean?**

*A: When the interviews take place, the jury has already read the papers and prepared questions to clarify technical information and to give them a better understanding of your project. If your paper is informative and well presented, it may be that the judges have all the information they need.*

**Q: Will the judges understand my project?**

*A: Yes, the members of the jury are water experts with extensive experience from a wide range of disciplines.*

**Q: I wish to show a Power Point presentation which lasts longer than 15 minutes. Will the jury let me use more time?**

**A:** *No, 15 minutes is the limit. In general, Power Point presentations are discouraged since the jury prefers interaction with the students.*

**Q: Will the jury come with constructive comments in order to help us develop the project?**

**A:** *No.*

**Q: Will the jury be available after the event to give us additional comments regarding our work?**

**A:** *No.*
